We make orthopedic implants SMART

SAFE REHABILITATION AT HOME

from External Traction ...

1950s

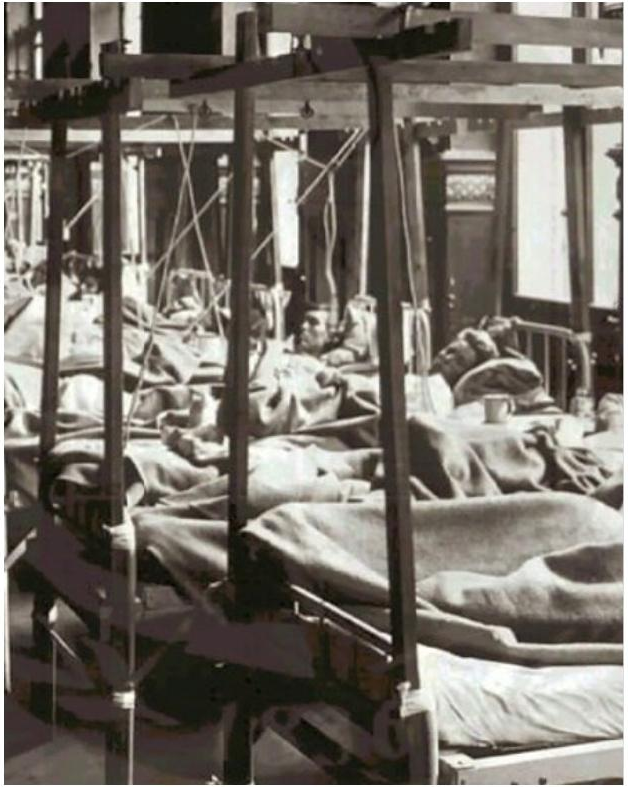
... to Internal Fixation

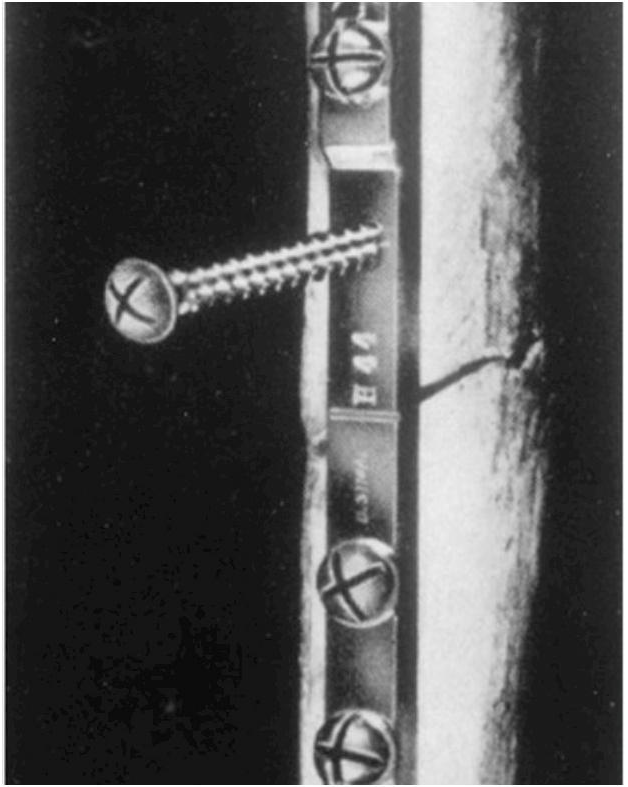
Surgical Revolution

2027

... to SMART Implants

Rehab Revolution





Hip Fracture

A global health crisis in the making - 14M cases per year today, 26M in 2050 due to demographic aging.

Care-Intense Patients

Frequent monitoring required

Healthcare overloaded

Critical Monitoring Gap

Surgeons are 'flying blind'

Low patient compliance

High Complication Rate

35% Re-Admissions

25% Death

Recovery data from the fracture site for continuous visibility on recovery progress anywhere anytime

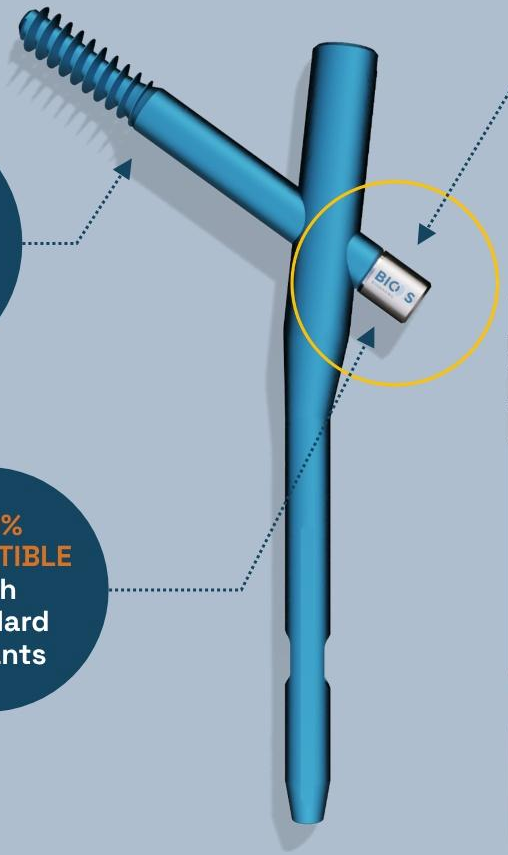
Care-givers get patient **non-compliance** alerts and can **react early** to potential complications

Real-time **feedback** on healing progress gives patients **peace-of-mind**

Hospitals **save cost** and **free up resources** due to less re-admissions

The world's first hip fracture recovery sensor

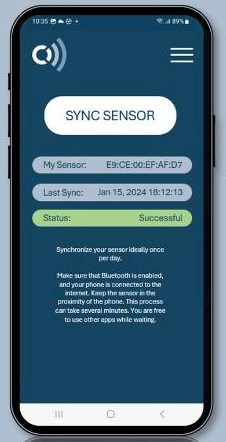
Patented Tech



Healing progress data directly from INSIDE THE FRACTURE

NO change in surgery technique

100% COMPATIBLE with standard implants



PATIENT CONVENIENCE

'Implant and forget' rehab monitoring

Biz Model & Why Now?

Value-Based Reimbursement

US Hospitals

Fixed bundle-payment per patient for surgery & rehab as of 2026

Sensorized home-care enables

- Fewer ER visits & Re-Admissions
- Shorter inpatient length of stay
- Rehab cost reduction

$800k

additional annual profit

Precedence case - Persona IQ® The Smart Knee® Implant

Cost Savings (first 12 months)

- $10’682 / patient (38% less)

Fewer **ER visits / Re-Admissions**

- Average 26% / 31%
- Frequent Users 48% / 51%

Reduction **Acute Care**

- Average 26%
- Frequent Users 27%

Market

DATA

Health insights based on empiric data

OEMs, payers / insurances, pharma

$ 19.4B

TAM:

26.5M joint replacement & trauma fixation cases worldwide

$ 3.4B

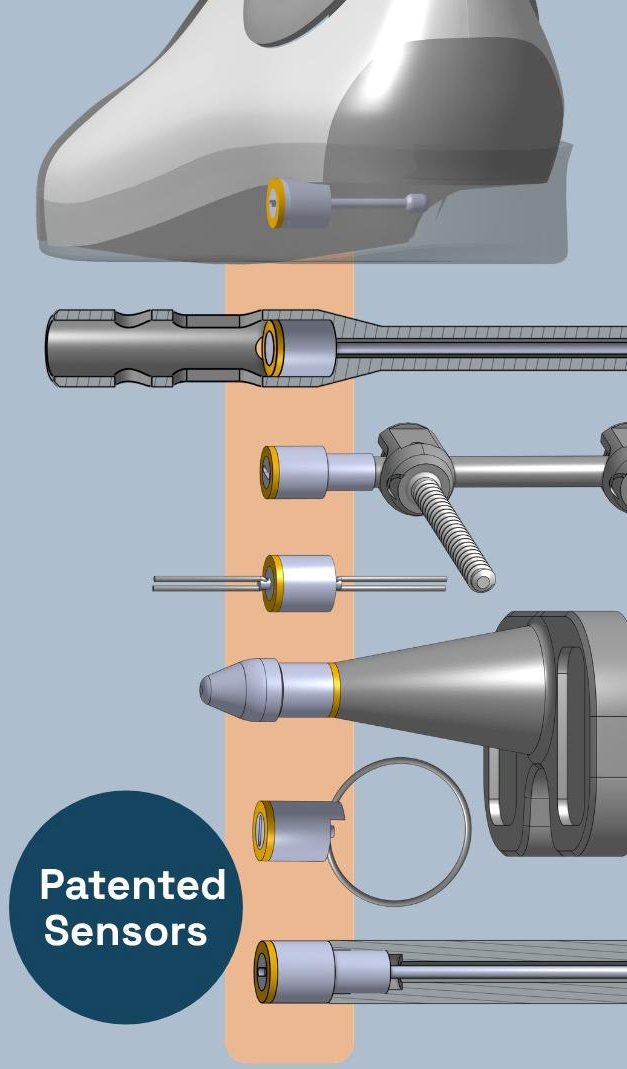
SAM:

4,235 US hospitals, **6 patented sensors** for hip, spine, ACL, knee, sternotomy, nail conditions

$ 108M

SOM:

745 US "TEAM" hospitals, **hip fractures only**



Status Quo

IP / Tech / Supply Chain

Expedited & De-Risked Path to FDA Clearance

Reliable system performance under clinical conditions

Value Based Reimbursement

- Pay-for-Performance (P4P) - Cost Savings Participation
- New Technology Add-On Payments (NTAP)
- Remote Patient Monitoring (RPM)

Distribution partnership

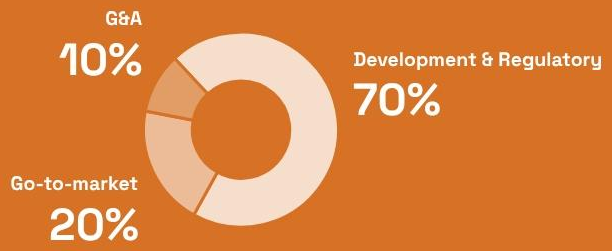
FIRST IN HUMAN

- Direct Equity Invest
- Closing date: 30 June 2026
- Valuation: Design Freeze Milestone
- Ticket size: CHF 100k - CHF 1M
- Target runway: 18 months

Use of Funds



In 20 years, every orthopedic implant will be SMART, making home the new standard of care.

Let's discuss how BIOS Medical fits your MedTech thesis.
